

## The Murphy Bed

The Murphy Bed Kit is a universal, structural steel bed frame and mechanism designed to be fitted within a cabinet. The design is complete with the fold-away leg system and is designed to exceed the strength of wood or aluminium as well as residential and commercial specifications.

The Murphy Bed Kit comprises the components and plans you need in order to build your own Murphy Bed. Designed to be fitted within a cabinet, Hideaway Beds provide you with a comprehensive cutting list, bill of materials and construction guide for precise cabinet assembly.

### Benefits

Our Murphy Bed Kits are made for use with Single, Double, Queen, or King size beds and the versatility of the design gives the user the option to mount the frame in the vertical or horizontal mode. Designed for every day use, this mechanism allows for varying spring combinations in order to balance all bed sizes, and creates easy fingertip operation. Limited 5 YEAR warranty on manufacturers defects. *Misuse, abuse, or damage by misapplication are not covered.*

- Less inventory is held as mechanism is common to all sizes of frame
- Transport: packed efficiently
- Cutting diagrams & pick list included for efficient cabinet construction
- Accessories include rollers, extrusion, and all parts needed for sliding door construction
- Versatile - the right solution to sleeping and flexibility of space.
- Small Footprint
- Automatic legs
- Balanced finger-tip Up & Down operation

### Installation

Murphy Bed systems are not for DIY assembly. The bed must be assembled and installed into a purpose built cabinet by a competent Carpenter/ Joiner using the appropriate technical specification.

**Please note:** wall bed frames and mechanisms are illustrated with cabinets and doors (purchased separately) for demonstration purposes only - for matching cabinets and wall bed furniture, please refer to our furniture product sheet.
