

# THE FOLDAWAY BED

## KEY FEATURES

- Tough heavy duty design built to last
- Counter-balance springs enclosed within patented adjustable mechanism unit
- Weightless, safe lifting action
- Beech slatted lying surface
- Can be stored with bedding & available to use with minimal effort
- Contemporary European design

The Foldaway integrated wall bed system implements a European design to be fitted into a purpose built cabinet to create a stunning 'Hideaway effect'. In less than 20 seconds the bed can be pulled out and ready to use. We provide interlocking straps which allows the bed to be stored with the bedding already made up, making the whole experience effortless.

The Foldaway bed is designed to have a single, full-height door attached to the base of the bed. The Foldaway bed has an adjustable sprung mechanism which gives a safe, light and easy lifting action. The leg sits inside the bed when folded away, but when in use the leg is manually folded over the foot-end of the bed and sits on the underside to support the bed when in the down position.

The patented, enclosed counter-sprung mechanism supports the weight of the bed and mattress. When folded away the bed and cabinet typically sit only 53cm from the wall, allowing for maximum use of the surrounding area. A key feature of the bed is the sprung slatted mattress base that ensures enhanced spinal support and comfort.

Limited 5 YEAR warranty on manufacturer defects. Misuse, abuse, or damage by misapplication are not covered. Please note: wall bed frames and mechanisms are illustrated with cabinets and doors (purchased separately) for demonstration purposes only.
