

Important Handover Information – The Next Bed

Please read the following information carefully before using your wall bed and retain it for future reference.

Safety before use

- It is the consumer's responsibility to ensure that anyone using the wall bed has been shown how to operate it safely before use.
- We recommend that only adults operate the wall bed. Failure to use the bed correctly may result in injury or damage to the person or product.
- Due to the risk of entrapment, children must not play on or around the bed in either the sleeping or stored position.
- Ensure the wall bed is securely fixed to the wall or floor before pulling the bed down for use.
- It is the fitter's responsibility to ensure that the correct fixings are used for the specific wall or floor type. The fixings provided may not be suitable for every installation.

Using The Bed

- Always keep a hand on the bed frame when raising or lowering the bed.
- Do not allow the bed to drop freely or slam open or shut.
- Please ensure the bed is pulled down using the centre of the white connecting leg bar.
- Secure the bedding to the mattress using the strap before putting the bed in the upright position.
- Make sure that no bedding is protruding, as this could damage the mechanism.
- Secure the pillow beneath the bedding strap where applicable.
- Do not remove the mattress while the bed is in the horizontal position unless the bed frame is being supported by another person.

Maintenance & Moving The Bed

- The bed and cabinet (if applicable) should be checked regularly for signs of wear.
- If the bed needs to be relocated, do not remove any fixings until the bed is in the vertical position.
- Relocation should ideally be carried out by a qualified or competent fitter.

- Spring-balanced mechanisms must not be adjusted except by a qualified or competent fitter.
- As part of the deinstallation process, the springs must be removed first.
- Please ensure that the springs are kept well lubricated.
- If the mattress is replaced with a lighter or heavier model, the number of springs installed may need to be altered to maintain correct counterbalance of the bed.

If you have any questions or concerns about any of the above, please contact your point of sale, who will be happy to assist.
